Subject: Aviation Ordinance

Greetings,

I'm adding a brief addition to my commentary Monday night.

Although I am against aviation for the purpose of tourism and other leisure use, I do think a differentiation must be made.

I support an ordinance that allows for emergency operations, BLM/other land management, and additional services deemed necessary to the community as needs arise.

The current use of drones, planes, and light aircraft is already an annoyance and as I mentioned earlier a hazard to us all.

Thank you,

Dawn DiLego
