I wanted to provide some additional information on the work that is being done in Ranger Wash/Canyon below HWY 191. These pictures show about 7:30 AM this morning. I have sent these also to the Army Corps of Engineers responsible for the drainage. Their office is in Sacramento Alyssa.J.Schaff@usace.army.mil. It seems that they might have some control over the waterway. Please share with the Town council these pictures. I would like to know that this info has been sent to the town.
