

PUBLIC COMMENT  
AVIATION FACILITIES WITHIN TOWN LIMITS  
SUBMITTED FOR THE MAY 22, 2023 COUNCIL MEETING  
HELIPORT

The issue of building a heliport within town is one which I have to oppose. The town is in a canyon, so the considerable noise of operating a helicopter would be significantly magnified by echoing off the canyon walls. In addition, helicopter operations generate an enormous amount of wind, which in our town means a huge amount of dust deposited everywhere.

I am truly sorry that the owner of the Desert Rose has already spent money toward this end, but the lack of consideration for the people who would be affected was entirely avoidable.

Respectfully,  
John McKenney
