Subject: Politics

Hi everyone!

I don't go to meetings because I see everyone everyday. I hear plenty of mean things and I smirk behind my mask. Covid-19 will probably kill me at some point but that's ok. It's not this life I live for but the next. But I will gladly work as long as claim able to do so. This virus people don't care about it rough. It will catch you when you least expect it.

I could care less what happens in this town, politically. If the rich want to be more rich and make it harder for those of us in the working class to live here, so be it. Wealth will not save anyone. Give it away to the poor, the suffering, the homeless, those without food, and the sick. Those are the people I see everyday.

I find it amusing that people are afraid to comment at meetings because they are scared of them. I once heard a comment that someone told me that they wished the council would all die. We will all die. Some will chase money. Some will help the least of society. There is much pain and suffering out there. Yes my main job is to help all with their incoming and outgoing mailings. More important to me is to console the suffering and to be nice to people. It doesn't matter to me what people believe in. Only what's in their hearts.

Good luck Town Council!
