Subject: Fire Mesa Kitchen

Dear Mayor and Town Council Members,

I write this letter in support of revisiting the cost of renting Fire Mesa kitchen.

As a resident who lived across the street from the community center for several years, I did not observe frequent use of this resource. It seems reasonable to imagine rental costs may play into that. It is also reasonable to rethink ways to make the facility more assessable to the community as a whole.

Please consider the suggestions offered by locals such as reducing the daily fee, and/or creating long-term contracts which reduce the overall cost of usage. With some creative thought and collaboration other ways to offset the Town's financial burden could be negotiated at the time a contract is written as well.

Structures degrade without regular use and kitchens are meant to be enjoyed. It is my understanding that Fire Mesa was built to be loved and utilized regularly. It was meant to serve a thriving community. Help the community uphold that vision by entertaining new ideas and more cost-effective conditions of use.

I appreciate your time and consideration of these comments.

Sincerely,

Dawn DiLego
